

ADVANCE HEATING & AIR,

a family-oriented company, was founded by Benton Young. With over 34 years of experience in the field servicing Sumter and surrounding areas, we earned the title of being a Tempstar Elite Dealer. This prestigious title means we are at the leading edge of HVAC technology in providing superior customer service with these products, and we plan to keep it that way. Not only are we a Tempstar Elite Dealer,

but we are also certified by NATE, the industrial leaders in technician certifications in the United States. We hold a state mechanical license, which allows us to be an independent HVAC contractor and work on almost all heating and cooling equipment. We are also proud to be certified by the Environmental Protection Agency, whose main focus is on a GREEN industry.

Preventative Maintenance Agreement

Options Available-Call for details

Features:

Your equipment is inspected and maintained regularly by a trustworthy technician. You will benefit from front-of-the-line professional maintenance service.

Benefits:

- Your maintenance agreement lowers operating costs by identifying minor issues before they become costly repairs.
- Planned maintenance customers receive priority on service!
Call for more details.

UV Lights

as low as \$395

Features:

Inhibits bacteria and mold growth on the indoor cooling coil and drain pan. Helps maintain system efficiency. Compact, reliable, ozone-free.

Benefits:

The ultraviolet light provides a cleaner indoor coil, improved indoor air quality, and improves your health as the system circulates conditioned air in your home.

Carbon Monoxide Monitor

\$125

Features:

This CO Monitor uses advanced technology to detect low levels of CO. It is a battery-operated unit that will operate even when household electricity fails.

Benefits:

- Alerts you to carbon monoxide, an invisible, odorless, tasteless, poisonous gas undetectable to your senses.

Glowfly Universal Hot Surface Igniter

\$150

Features:

Built with silicon nitride; 3-year warranty.

Benefits:

- Build tough; it is less prone to breakage or failure.
- Glowfly is perfect for older systems.

Surge Protector

\$165

Features:

Designed to dissipate the damaging effects of momentary voltage spikes or other transient power surges; specially made for HVAC systems.

Benefits:

- Helps protect your equipment.
- Includes a limited lifetime warranty against manufacturing defects and a \$1,000 per occurrence.

Wet Switch

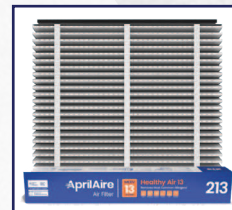

\$145

Features:

Built-in test and reset button. One or two drops will cause Wet Switch to turn off a unit; more than one unit may be connected to a system.

Benefits:

- Prevent flooding and damage to carpets, walls, furniture, ceilings, etc. It turns the system off when moisture due to condensate or drain leaks is detected.

AprilAire 213 Air Filter

\$595

Features:

MERV 13 high-efficiency replacement air filter designed for AprilAire whole-home air cleaners. Captures airborne particles such as dust, pollen, mold spores, pet dander, and bacteria. Large surface area for improved airflow and long filter life.

Benefits:

- Improves indoor air quality by trapping harmful particles, helps protect your HVAC system, and delivers cleaner, healthier air throughout your home with fewer filter changes.

Wi-Fi Thermostat

\$390

Features:

Wi-Fi enabled thermostat with a large touchscreen and remote control via smartphone app. Compatible with most HVAC systems and offers programmable scheduling.

Benefits:

- Control your home's comfort from anywhere, simplify daily temperature adjustments, and help reduce energy usage with smart scheduling.
